2800VB

Value Balancing Currency Counter

Two pocket denomination recognition currency counter

2800VB

Value Balancing Currency Counter

The De La Rue **2800VB** two pocket denominating counter takes value balancing to a higher level, dramatically increasing throughput and productivity.

Non-Stop Throughput

The **2800VB** provides:

- Mixed denomination value balancing while off-sorting rouge denominations and error notes
- Off-sorts operator selected denomination (cull mode)
- Non-stop sorting of old and new style currency
- Non-stop facing and orienting of currency

Easy to Use

Notes are identified and valued regardless of orientation. Presorting and facing of notes is not required.

Increased Accuracy

The **2800VB** features the latest technological approach to currency pattern detection. This technology greatly improves misclassification and "no read" performance, maximizing recognition accuracy and note throughput.

Multiple Functionality

In addition to mixed denomination value balancing, the **2800VB** off-sorts rouge denominations based on the first note through and off-sorts operator selected notes using the cull mode.

De La Rue Cash Systems coin and currency processing products are the direct result of 100 years experience in the design, manufacturing and distribution of world class cash handling solutions. Worldwide service and support is provided through De La Rue Cash Systems' network of branch offices and authorized distributors.
