

# AMROTEC TELLER CASH DISPENSER

## AMROTEC 400

The AMROTEC 400 offers a cost effective, space saving solution to currency dispensing utilizing proven dispensing technology. This compact dispenser provides the ability to dispense from one to four denominations. Optional coin dispensers can be attached to complete the dispensing package.

Notes are deposited into a tray at the front of the dispenser. Highly visible left and right indicator lights designate which cashier is the "owner" of dispensed cash in a dual workstation environment.

The dispenser is encased in a UL 291 security safe enclosure with electronic lock. The small footprint allows for under counter installation. Optional security features can be added, making the AMROTEC 400 an extension of the vault cash area.

## YOUR BEST SOLUTION FOR BANK TELLER OR RETAIL CASH DISPENSING

- Weight: 590 pounds
- 4 cassettes
- Note capacity: 2,000 per cassettes
- Dispense Speed: 6 notes per second

**Increased Productivity** allows you to process more customers in a shorter amount of time, eliminating the need for additional employees and physical expansion of your facility. This simple to use system saves training time, decreases customer wait, increases morale, reduces turnover, and decreases time spent counting currency and balancing.

**Improved Accuracy** results when costly errors are avoided. Automating the dispensing process also promotes employee confidence and decreases anxiety. Customer transactions and cash replenishments are completed quickly and error free.

**Additional Security** features provided by the AMROTEC 400 protect the vulnerability of your cash and your personnel. The system reduces the need for money in the cash drawer, thus decreasing the exposure to both internal and external theft.

**Cassettes** are made of rugged plastic, allowing them to be both durable and lightweight. Integrating the reject area into the top cassette removes the need for a separate reject bin. Security risks can be further reduced with the lock feature.

A LA Guard Model SAFEGARD **electronic lock** is used to control access into the safe enclosure. With 2 user-supplied alkaline batteries, this is the perfect solution for high-volume uses.

An optional Telequip coin dispenser can be purchased to complete the dispensing package. This coin dispenser is available in both single and two-sided models.

**Inside the AMROTEC 400** is proven and reliable Puloon technology. At the heart of the AMROTEC 400 is the Puloon Multi-Cassette Media Dispensing Unit. Puloon has over 10 years of experience designing and building dispensing devices of legendary quality. Its solid design, advanced diagnostics, and superior picking mechanism combine to result in more uptime and lower maintenance costs.

#### Safe Ratings
