

UNSTOPPABLE

Glory's ReadMaster Currency Discriminator: Uninterrupted deposit processing.

At Glory, great things do not necessarily come in large packages. The new GFR-100 ReadMaster Currency Discriminator gives you an advantage over larger machines in a conveniently smaller size.

Counting mixed denominations up to 1,000 notes per minute, the ReadMaster rejects unwanted bills to a separate hopper without interrupting the counting process, a feature not available with any other compact counter. Within seconds, the operator is given a complete evaluation of the deposit's total value, piece count and the value of each denomination processed.

Now, with uninterrupted deposit processing available,
nothing should stop you from calling Glory today.

GLORY[®]
Cash Handling Systems

The GFR-100 ReadMaster Currency Discriminator: Deposit Processing With No Interruptions.

Glory's Currency Discriminator provides faster and more reliable deposit processing by eliminating the common interruptions of rejected bills.

The advantages include an over-sized feed hopper capacity of 500 notes, a counting speed of 1,000 notes per minute of mixed currency and displayed or printed reports of either one or all denominations.

The innovations continue with a large divert pocket capacity, a convenient access panel for cleaning sensors, and Glory's own state-of-the-art "suspect note detection."

All these and many more features come in a compact design that weighs only 33 pounds.

Features

The ReadMaster offers three modes of operation for uninterrupted counting of mixed denominations.

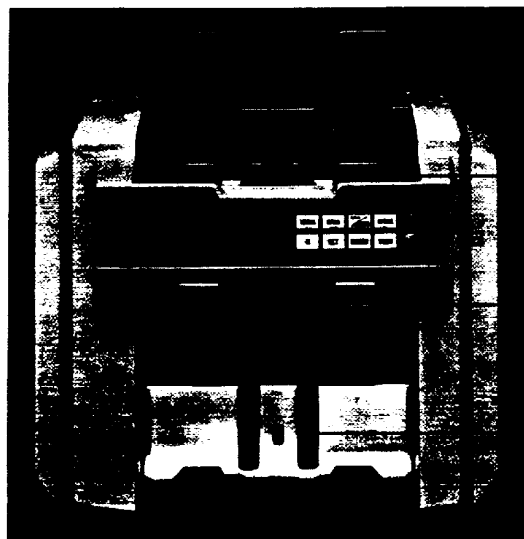

The **Denomination Detect** mode counts notes of a single denomination and separates all others to a different hopper.

The **Mixed** mode identifies and counts all denominations and provides a detailed summation of each currency and/or the total batch count.

The **Count** mode will count any currency, coupons or food stamps without using the denomination reading feature.

The **Manual Entry** function then allows the operator to use the keypad to add to the counted total the notes rejected because of poor quality.

Printer: Optional interface capability with RS232 serial printers.

- Currency guide plates
- Currency feeder adjustment screw
- Hopper
- Divert pocket
- Stacker

Specifications

Count speed:	1,000 notes per minute
Hopper capacity:	500 notes
Stacker capacity:	200 notes
Divert pocket capacity:	20 notes
Add function:	Yes, for aggregate counting of notes
Batch stops:	10,20,25,50,100 presets Manually adjustable for odd batches
Suspect note detection:	Enhanced magnetic detectors plus denomination scan for suspect notes
Display:	LCD 16 characters x 2lines, Size 4mm Value/piece count display
Power supply:	AC 115V, ±10%, 60Hz
Dimension:	13.4"(W)x13.4"(D)x11.8"(H)
Weight:	33.3 lbs
Options:	Interface(RS232), Printer
