COUNTER/SORTER

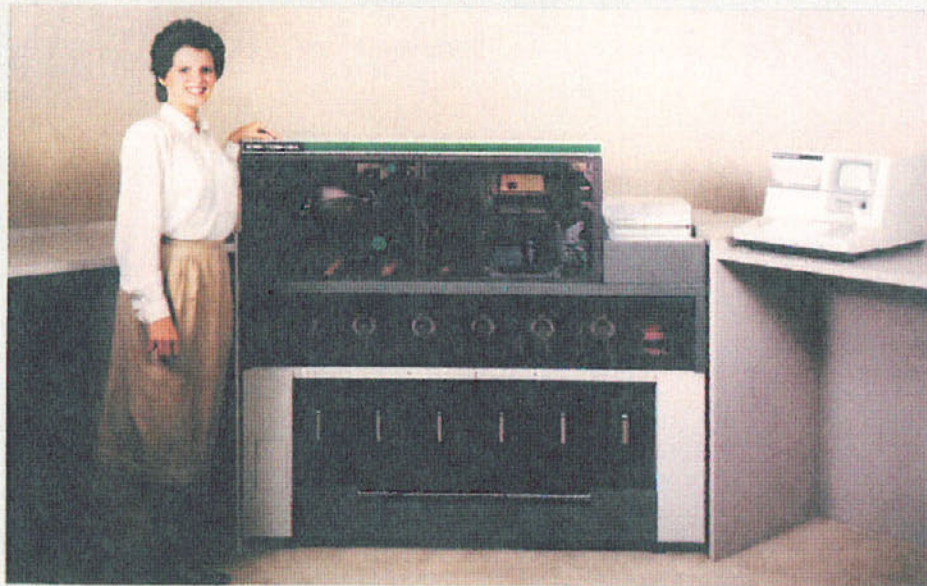

ADVANCED  
TECHNOLOGY  
ACHIEVES  
ONE-STEP  
DEPOSIT  
PROCESSING &  
VERIFICATION.

MODEL CS 6600

**Mosler**

# REDUCE COMMERCIAL DEPOSIT TIME AND COSTS—UP TO 60% WITH THE MOSLER/TOSHIBA CS 6600.

BY OPTICALLY  
READING EACH NOTE,  
THE CS 6600 COUNTS,  
SORTS FACES, BATCHES,  
AUTHENTICATES,  
TOTALS & PROVES

ALL IN A  
SINGLE PASS.

## NOW YOU CAN PROCESS MIXED CURRENCY AS EASILY AS MIXED COIN

The CS 6600 incorporates the most advanced technology in optical scanning and currency processing into a proven system that simultaneously sorts, counts and faces six different denominations faster and more accurately than you would have believed possible.

## TOTALS AND PROVES

The CS 6600 totals and proves a variety of commercial deposits including: envelope accounts, regular accounts, bulk deposits, special deposits and cashier deposits.

## REMARKABLY SIMPLE TO OPERATE

Designed to be user-friendly, the CS 6600 has a built-in screen that provides prompt, step-by-step directions for the operator. A few hours of instruction make it possible for any member of your staff to operate the CS 6600 easily and productively.

## SOPHISTICATED SOFTWARE

To balance at the end of the day with the CS 6600, simply touch a single button to get a summary of all transactions—including reconciled cash balances—in a

familiar format. It provides for a quick and simple, clear and accurate transfer of currency to your vault.

Furthermore the CS 6600 memory can be used to develop entries for general ledger proofs and department ledgers. In addition, the journal printer logs every transaction including corrections, system conditions and supervisory interventions. Thus the system provides comprehensive management control through hard copy audit trail.

### INCREASED ACCURACY AND THROUGHPUT

The CS 6600 offsorts suspected counterfeits, questionable and damaged notes. When it encounters suspected counterfeit currency, it not only offsorts the bills, but also alerts the operator by light and sounder. This offsort capability maximizes system throughput without jeopardizing counting accuracy.

### FOUR-LEVEL MEMORY

The system provides four memory levels: Envelope, Deposit, Account/Batch and Day. It can also be instructed to require the entry of a declared amount for envelope and deposit level control, which allows the system to provide maximum flexibility in meeting reporting and balancing requirements.

### MULTI-MEDIA CAPABILITY

Offsorted notes by denomination, coin, checks, and food stamps, along with seven other user-identified categories, can be entered through the keyboard.

In addition, hard copy receipts for deposit, duplicate deposit and cash in/cash out transactions are printed on demand.

### FITNESS SORTING

The fitness sorting feature puts you in control of the quality of currency you dispense through your branches, ATM's or to your customers. A simple turn of a wheel changes the quality to meet your requirements. Variable stacking from one to 2,000 bills suits virtually every need.

### DEPENDABLE MOSLER SERVICE SUPPORT

The Mosler Service Team is made up of over 1,100 highly skilled, expertly trained technicians who are on standby around the clock, seven days a week in hundreds of locations in all 50 states ready to support you and this extraordinary currency handling technology. We never leave your side.

That's the kind of service you'd expect from the Mosler Service Team, who have backed Mosler products with quality service for over a hundred years. That's the reason why we say, with Mosler, all is well.
