

DE LA RUE
CASH SYSTEMS

DeLaRue

3700e the world's leading **note sorter**

for **today's** banking business...

The world-wide banking scene is changing. At the corporate level, mergers, competition and new banking services have raised expectations.

Day to day, more and more cash has to be managed more effectively. More ATMs have to be refilled and kept fully operational. Poor quality notes have to be taken out of the system. Then there's the increasing sophistication of counterfeits. For everyone involved - the central banks, the commercial banks, the cash in transit companies - the daily business of processing notes brings new challenges and demands for greater efficiency.

This is where the 3700e note sorter is already helping hundreds of banks and banking service companies to succeed.

The 3700e is well proven as the note sorter of choice for the world-wide banking business.

Designed to adapt to changing demands, the 3700e will address your current requirements, and the problems you'll face in the future. De La Rue has taken care to understand your needs and to apply the best technology to ensure that the 3700e is:

RELIABLE

Designed for heavy duty use, the 3700e gives months of trouble free service.

It has the best-of-class transport system capable of handling even poor quality notes. A single pick feeder system minimises the chances of skewing.

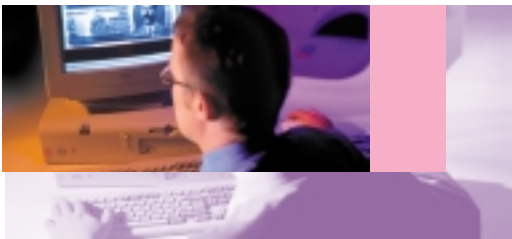

COST EFFICIENT

Trouble-free operation, a low maintenance requirement and a thoughtful design that makes parts ensures that the cost of ownership is low.

“Since using the De La Rue 3700 to sort notes for ATMS we have dramatically reduced the number of jams. This has reduced call out charges to our ATMs, reduced down time and allowed us to improve the service we offer and provide to our customers”

AsianBank, Philippines

only the **best** will do

UPGRADEABLE

A wide range of detector options are available to match your requirements, and these can be changed if needed. Hence the 3700e can adapt to changes in currency, new standards of quality control, or to detect new types of counterfeit.

ACCURATE

Unlike people, the 3700e can consistently maintain the highest level of sorting accuracy, throughout the day. It makes its decisions by checking a variety of parameters, ensuring that high quality notes are separated from poor quality notes, and genuine notes from counterfeits.

“(The 3700s)...are providing excellent results in the sorting of unfit notes, count and detection. This high quality equipment is extremely efficient.”

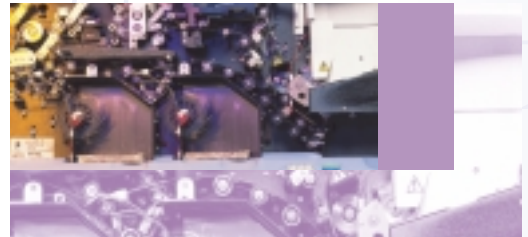

Bradesco, Brazil

join the **best**

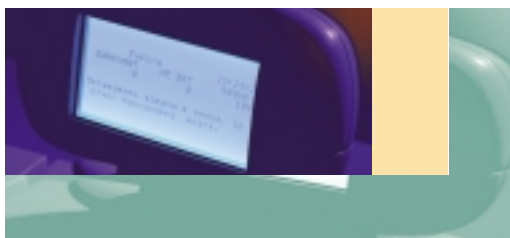

FLEXIBLE

The criteria for sorting notes can be set and changed by you. It is your choice which processes to use and whether to reject, separate or ignore new issues.

CUSTOMER SERVICE

Just as important as the excellent features and reliable operation of the 3700e is the fact that with De La Rue, expert help is always close at hand. De La Rue has a world-wide network of accredited partners and regional service offices, on-call to offer help and support.

EASY TO USE

It only takes one person, seated or standing to operate the 3700e. The processes and parameters can be easily set via the screen and keyboard. Operator instructions are currently displayed in any one of 22 languages and further languages can be added.

As the world leader in cash handling solutions, De La Rue has helped to achieve greater efficiencies in thousands of banks and related operations.

Our ongoing research and development and constant re-evaluation of customer requirements means that all De La Rue equipment, including the 3700e, benefit from the latest innovations.

The 3700e has proven itself to be truly robust and has a track record of operating all day, everyday, for years. This high level of reliability and quality will save you both time and money, making the 3700e note sorter an essential piece of equipment.

“We are delighted with the performance of the 3700; in particular its counterfeit detection”

RCBC, Philippines

...from the **name to trust**

De La Rue is known world-wide for its cash handling solutions and the 3700e is well established as the world's leading note sorter. It is used by central banks, commercial banks and CITs in more than 100 countries.

The reason for its popularity is clear; it's a reliable, low cost, upgradeable note sorter that gets the job done quickly, efficiently and accurately.

Backed up by De La Rue's international service network, and our many years' of experience in providing cash handling solutions, the 3700e offers the best way to:

- cut time and costs of processing
- quickly and consistently sort for fitness
- identify counterfeits
- reduce backlogs of unprocessed cash
- improve customer service
- increase profitability.
